ANNUAL REPORT 2018
Sir, Madam,

It’s with great pleasure that we present the Climate Chance Association 2018 Annual Report.

As you will see, 2018 marked the year of important evolution within the association’s activities, notably with the first “Climate Chance” Observatory Report, the portal of action, and the first Summit in Abidjan dedicated to African actors...

These actions, all driven by the committed Climate Chance team I must salute, are gaining momentum in the context that we are all well aware of: one of a world dependent on fossil energies, and still today incapable of changing this shameful route despite the mounting scientific reports.

Being without a spare planet and without other solutions, we tirelessly pursue our rallying by: sharing best practices, putting different actors in contact so they can be mutually strengthened, analysing the success stories on a national level, local level, within an association or a business in order to learn lessons and bring forward new operational proposals, defending the necessary convergence of strategies with the implementation of the Sustainable Development goals and the defence of biodiversity, another crucial issue that we struggle to measure the importance of.

The increasing power of public opinion calling for action to live up to the threat of climate change, represents a factor of hope for the end of the year. Their request must be satisfied, which requires operational actors and efficient frameworks, particularly in terms of access to funding.

This is the challenge for a structure like Climate Chance, the only international association seeking to bring together and federate all non-state actors in their diversity: participating in strengthening actions via observation and linking actors together.

It’s often difficult to measure this action as it’s not quantifiable in KWh or hectares, however it is the necessary base for the emergence of projects and for their enhancement. We therefore thank those who trust us, public and private financers and that understand the interest.

Nothing would be worse than backing down facing the catastrophe that’s to come, and I do not doubt that reading this report will convince you of our determination and of the impact of our modest actions.

"The increasing power of public opinion calling for action to live up to the threat of climate change, represents a factor of hope for the end of the year. Their request must be satisfied, which requires operational actors and efficient frameworks, particularly in terms of access to funding."

OCTOBER 2018
THE 13 PRIORITY ACTIONS TO INCREASE ACCESS TO CLIMATE FINANCE FOR NON-STATE ACTORS WERE PRESENTED DURING A PUBLIC HEARING OF THE EUROPEAN ECONOMIC AND SOCIAL COMMITTEE AND INCLUDED IN AN OWN-INITIATIVE OPINION BY THE LATTER

DECEMBER 2018
CLIMATE CHANCE IS RECOGNIZED AS AN OBSERVER BY THE UNITED NATIONS FRAMEWORK CONVENTION ON CLIMATE CHANGE (UNFCCC)
In 2018, Climate Chance continued to develop its activities by creating regional events, launching the Portal of Action, releasing the first Report of the Global Observatory of Non-State Climate Action as well as publishing roadmaps on our funding priorities and accomplishments following our last events. Climate Chance is progressively becoming a staple place for sharing climate-related good practices and solutions for actors working on the ground around the world.

Climate Chance Summits, unifying events
Since 2015, Climate Chance has brought together local communities, businesses, NGOs, unions, members of the scientific community, representatives of the agriculture sector, youth, indigenous peoples and women in Lyon, Nantes, Agadir thanks to the organisation of various worldwide summits for non-state actors.

In 2018, Climate Chance began to create regional events to increase its impact. This entailed organising the European Dialogue for Non-State climate action in Brussels in collaboration with the European Economic and Social Committee (EESC) alongside the European Committee of the Regions and the Climate Chance Africa Summit in Abidjan with the Assembly of Regions and Districts of Ivory Coast.

Since the very beginning, the Climate Chance Summits aimed to draw up a clear picture of non-state climate action around the world, to develop exchanges on success stories as well as encountered difficulties, and to encourage sharing experience in order to achieve the objectives of the Paris Agreement.

At the heart of the association’s action is a bottom-up approach and collective work. Indeed, the call for proposals mechanism and the creation of thematic coalitions both enabled Climate Chance to demonstrate the potential climate action of non-state actors by highlighting the quality of their initiatives and concrete actions in the reduction of greenhouse gas emissions.

Multi Stakeholder coalitions at the heart of Climate Chance
The global coalitions that Climate Chance supports are put together by non-state actors with international influence.

The main networks of local governments such as ICLEI (focal point of the local governments and municipal authorities constituency at UNFCCC), UCLG, R20, C40, nrg4SD, FMDV, Energy cities, CCRE-CEMR, the International Association for French-speaking Mayors (AIMF) as well as business networks such as the International Chamber of Commerce or Global Compact France, and even international Youth networks like CliMates, YOUNGO and international environmental NGO networks such as CAN-International, are all represented.

This diversity is gathered within the coalitions, under the actor’s domain of expertise, in different strategic sectors such as transport, energy, urban...
planning, building, urban development, education and water etc.

These thematic coalitions aim to encourage synergies between different types of non-state actors, by improving the information flow and by encouraging new projects and initiatives to emerge.

Another example of the work led by the coalitions in 2018 is the case of the African coalitions that were created at the Climate Chance Summit - Africa. The African roadmaps that were a result of the thematic workshops of the Abidjan Summit, were submitted to the Talanoa Dialogue Platform.

**Tools for catalysing action**

As well as the Summits, the association acquired two new tools in 2018 strengthening capacities of non-state actors: The Portal of Action and the Observatory of global non-state climate action.

The concrete work of the coalitions displayed in the international climate scene

Results from coalitions are monitored and carried by Climate Chance during important events on the international climate agenda.

In 2018, Climate Chance submitted the “13 Priority Actions to increase Access to climate finance for non-state actors”, which was elaborated by the Finance Coalition, to the Talanoa Dialogue Platform.

These 13 priorities were also discussed during the European Dialogue on Non-State Climate Action and were included in the conclusions. Similarly, on the 30th October 2018, these priorities were presented at Brussels to the EESC member and were partly reflected in the EESC opinion published on the 15th December 2018 entitled “Facilitating access to climate finance for non-state actors”.

The Global Observatory of Non-state climate action published its first Report in November 2018. Presented in the form of 3 books on sector-based action, local action and the financial action of non-state actors, it’s an evaluation tool of progress in climate action. It can be likened to a repository for decision-makers on the success and failures of projects led by all types of non-state actors.

The launch of the portal of action

In June 2018 which was announced during the Climate Chance Africa summit in Abidjan represents a means of strengthening capacities of non-state actors and bringing light to their work. Comprised of 3 tools (the cartography of action, the Climate library and the Climate Agenda) the Portal aims to facilitate access to knowledge and information and hopes to enhance synergy among actors by bringing them together.

2 CO-ORGANISED EVENTS
14 SIDE EVENTS
ALMOST 1000 PARTICIPANTS
+ THAN 100 ELECTED REPRESENTATIVES
+ THAN 120 NGOS
97 INVITED SPEAKERS
3 ADVOCACY POSITIONS RELAYED
30 PUBLIC APPEARANCES
Climate Chance has organised and participated throughout 2018 in many events on the international climate agenda (European Dialogue on Non-State Climate Action, Climate Chance Summit-Africa, Global Climate Action Summit and COP24). The objective being always to bring concrete proposals and initiatives from the summits and spread them during international events.
The Climate Chance Summit - Africa was the first non-state African regional summit that gathered 600 participants from 41 different nationalities. It was also at the heart of a week of African climate actors working on the priority themes of the continent. This event was successful because of the high quality actors, the delivered work, launched initiatives and adopted commitments. This summit was also the opportunity for the Climate Chance Association to launch its new website climate-change.org.

- 8 SIDE-EVENTS
- 30 VOLUNTEERS
- 56 PRESS MENTIONS (JOURNALS, WEB, RADIO, TV)

**An event labeled Talanoa Dialogue**
The Climate Chance Summit closing plenary took the form of a Talanoa Dialogue, a process aimed at participating in raising the ambition of the Paris Agreement by responding to the questions: where are we? where do we want to go? how to get there?

The Dialogue was moderated by Jean-Pierre Elong Mbassi, secretary-general of UCLG-Africa and Bernard Soulage, secretary-general of Climate Chance, with a report back from the 10 thematic workshops and sectoral coalitions, and a discussion with Ivorian and French government representatives, committing to take into account the conclusions of the Summit.

**Work**
10 thematic workshops enabled the actors involved in the African sectoral coalitions to establish 8 roadmaps. These operational roadmaps, adapted to the context of African territories, represent the starting point for a long-term strategy to strengthen the joint work of non-state actors in Africa as well as the launch of concrete initiatives.

**THE THEMATIC WORKSHOPS**
* Access to climate finance
* Education and training
* Sustainable planning for the African Cities
* Territorial climate plans
* Agriculture and deforestation (including land degradation and desertification)
* Access to energy and energy efficiency
* Sustainable mobility and transport
* Adaptation and water issues
* Sustainable buildings and construction
* Sustainable supply chains

**OBJECTIVES**

**Bring together**
The Climate Chance Summit - Africa is to this day the most important and representative gathering of non-state climate actors on the African continent. This summit, exclusively by invitation, made it possible to take stock of non-state climate action in Africa.
Disseminate

This Summit allowed to deliver specific messages about the African continent, prioritize actions and formulate specific proposals from local actors fighting climate change in Africa. The African position was then disseminated during the international events of the climate agenda (Global Climate Action Summit in San Francisco, Africities in Marrakech, COP24 in Katowice), with a special focus on access to finance for non-state actors.

CLIMATE CHANCE IN MOTION

The 8 roadmaps formulated during the thematic workshops of the Summit were submitted in October 2018 to the Talanoa Dialogue Platform.

The Declaration of local and subnational leaders of Africa initiated at the World Summit of Non-State Actors in Agadir was signed by Manuel de Araújo, Mayor of Quelimane (Mozambique) and Vice President of ICLEI- Africa during the Global Climate Action Summit.

Vincent N’cho, deputy governor of Abidjan, was also part of the GCAS Climate Chance delegation to spread the results of the Abidjan summit.

Dr. Eugène Aouélé AKA, Minister of Health, President of ARDCI, Jeannot Ahoussou-Kouadio, President of the Senate of the Republic of Côte d’Ivoire, Anne Désirée Ouloto, Minister of Health, Environment and Development Jean-Pierre Elong Mbassi, Secretary General of UCLG Africa alongside Ronan Dantec and Bernard Soulage, respectively, President and Secretary General of the Climate Chance Association.

Vincent N’cho, deputy governor of Abidjan, was part of the GCAS Climate Chance delegation were the results of the Summit were brought.

Bernard Soulage, Secretary General of Climate Chance alongside Manuel de Araujo, mayor of Quelimane (Mozambique) and Leila Yassine, program coordinator in charge of the African continent for Climate Chance.
WE ORGANISED

THE CLIMATE CHANCE SUMMIT AFRICA, CORNERSTONE OF A WEEK OF AFRICAN ACTORS COMMITTED TO THE FIGHT AGAINST CLIMATE CHANGE

Aside of the two-day Summit, 8 partner events took place in Abidjan the same week as the Climate Chance Summit – Africa 2018: These parallel events were carried by:

- THE COVENANT OF MAYORS IN SUB-SAHARAN AFRICA
- THE FRANCO-QUÉBECOIS OFFICE FOR YOUTH
- THE AFRICA EXPERT ON FOREST, AGROECOLOGY, ENERGY AND CLIMATE CHANGE NETWORK.
- THE FRENCH EMBASSY IN CÔTE D’IVOIRE, THE CLUB OF ABIDJAN VILLE DURABLE (ABIDJAN A SUSTAINABLE CITY) AND THE FRENCH INSTITUTE.
- CODATU AND MOBILIZYOURCITY
- THE GLOBAL ALLIANCE FOR BUILDINGS AND CONSTRUCTIONS
- THE GLOBAL NETWORK FOR URBAN AGENCIES (MTPA-GN)
- COP IN MY CITY

Many important initiatives launched in Abidjan

The Covenant of Mayors in Sub Saharan Africa (CoM SSA) invited the mayors of the CoM SSA pilot cities to become ambassadors of the initiative and encourage other cities to join this community,

The summit was the occasion for the international partnership « MobiliseYourCity » to train local representatives from African cities (Morocco, Togo, Tunisia, Cameroon, Burkina Faso, Ivory Coast) to calculate greenhouse gas emissions, and allow them to build new urban and carbon neutral mobility policies.

A steering committee of the Metropolitan and Territorial Planning agencies network (MTPA) was initiated during the Summit in Abidjan for the creation of urban planning agencies in 5 new countries (Burkina Faso, Ivory Coast, Niger, Senegal and Togo), to structure a network of African urban agencies to support the climate transition.

New mayors sign the Declaration of Local and Subnational leaders of Africa

The summit was the opportunity for 9 local representatives from Senegal, Uganda, Ivory Coast, Ethiopia, Burkina Faso and Togo to sign the Declaration of the Local and Subnational African leader “Fighting Climate Change in Africa together”

“The Climate Chance Africa Summit is a real chance to deepen the reflection on the place and role of non-state actors in the face of climate change that compromises our development and common future”

EUGÈNE AKA AOUÉLÉ, PRESIDENT OF THE ARDCI
“It’s really a great experience to participate in Climate Chance, I met people of different nationalities who come from the subregion, from all over Africa and also from the rest of the world [...] we tried to discuss our activities on future ideas so that Africa can get rid of the problems of climate change”
AGBOOLA SHAKIRA, FOUNDER OF THE FEED NATURALLY AFRICA START-UP

“If you are an NGO you have to participate in a Climate Chance Summit, you meet committed people [...] we are 41 nationalities, it is unheard of”
JEANNE IRÈNE KOUMO, PRESIDENT OF THE PAGE VERTE NGO

EUROPEAN DIALOGUE ON NON-STATE CLIMATE ACTION

WHERE?
Brussels - Belgium

WHEN?
23rd April 2018

WHO?
Climate Chance, the European Economic and Social Committee, the European Committee of the Regions

KEY FIGURES

- 105 PARTICIPANTS
- 5 PARTICIPATORY CIRCLES ORGANISED
- 1 DOCUMENT SUBMITTED TO THE TALANOA DIALOGUE PLATFORM

A Talanoa Dialogue to take-stock on non-state climate action at the European scale

The European Dialogue on non-state climate action was structured to answer the three main questions suggested by the Talanoa Dialogue, mechanism put in place by the Fiji Presidency of COP23 to include non-state stakeholders into the debate. The Dialogue was introduced by answering the first two questions:
- Where are we?
- Where do we want to go?

The Dialogue was closed by answering the third question (How are we going to get there?) and with a summary of the recommendations from the participatory circles that took place during the Dialogue.

Ronan Dantec, President of Climate Chance alongside Tomasz Chruszczow - COP24 special envoy for climate change, high level climate champion (Copyright: EU 2018)
The work of Climate Chance’s Finance Coalition at the center of reflections

This day was an opportunity to have a thorough reflection on the work of the Finance coalition of Climate Chance. The Finance coalition is composed of 4 organizations: UCLG, Women Engage for a common future - France (WECF), Group for the Environment, Renewable Energy and Solidarity (GERES) and the Global Fund for Cities Development (FMDV) produced the document “13 priority actions to increase access to climate finance for non-state actors” at an event labeled One Planet Summit in December 2017.

Participatory circles to strengthen the action of non-state actors

By taking up the idea of sharing (sharing of ideas, skills and experiences through stories) promoted by the Talanoa Dialogue, 5 participatory circles were formed to analyze the action of non-state actors in Europe:

- Assessing and tracking non-state climate action
- Recognising non-state climate action
- Improving governance
- Enabling conditions for action
- Facilitating access to finance

Each circle highlighted an example of action by a non-state actor and answered 2 specific questions with a dual purpose: to identify good initiatives and analyze the brakes to action.

This document served as a basis for the reflection of the “Facilitating access to finance” circle and several of these priorities were included in the final document “Conclusions of the European Dialogue on Non-State Climate Action”.

CLIMATE CHANCE IN MOTION

The Conclusions of the European Dialogue on non-state climate action were submitted as a contribution to the Talanoa Dialogue Platform.

On the 29th October of 2018, the EESC organized a public hearing on "Facilitating access to climate finance for non-state actors", Climate Chance was invited to contribute to this hearing and focused on the 13 priorities actions of its Finance coalition.

Thus, this opinion contains 18 recommendations suggested by the coalition in this document and will guide the initiatives of the European Economic and Social Committee.

"Achieving the long-term goals of the Paris Agreement can not be realized by the governments alone "

Yvon Sligenberg - Director in DG Climate Action of the European Commission

"The Talanoa Dialogue Objective is to achieve results, and that’s what we want to achieve today - translate our work into commitments, actions and roadmaps "

Bernard Soulage, Climate Chance’s Secretary General

"Climate change is at the same time a threat and an opportunity to transform our economy, to create the political environment for transition."

Tomasz Chruszczow, COP24 Special Envoy for Climate Change, High Level Climate Champion

Anne Barre President of Women in Europe for a Common Future - France (WECF) and Vice President of Climate Chance (Copyright : EU 2018)
ECOLOGICAL TRANSITION SESSION DURING THE AFRICITIES SUMMIT

WHERE?
Marrakech - Morocco

WHEN?
20th - 24th November 2018

WHO?
Climate Chance organised a session on the Ecological Transition in Africa during the Africities Summit

KEY FIGURES
- 80 CLIMATE ACTORS GATHERED
- 9 HIGH LEVEL SPEAKERS
- 8 THEMES DISCUSSED
- 8 RECOMMENDATIONS

8 recommendations from the Ecological Transition Session organized by Climate Chance

The session was moderated by Luc Gnacadjia, former minister of Benin, former executive secretary of the United Nations Convention to Combat Desertification and Vice President of Climate Chance. Recommendations for a sustainable transition in Africa emerged on:

- Access to clean and renewable energy for African cities
- The circular economy at the service of African cities, for efficient waste management (solid and liquid) and better environmental health of residents
- Mobility and sustainable transport that is less polluting in African territories
- Environmental health in African cities: pollution and air quality challenges
- Soil conservation, sustainable agriculture and territorial food sovereignty
- Preservation of forests and biodiversity in the face of urban sprawl in Africa
- Adaptation to climate change, the importance of setting up early warning systems
- Financing mechanisms for ecological transition in Africa.

FIND THE RECOMMENDATIONS HERE:
Climate Chance contributed to the Climate day that was held on the 22nd of November

The Climate Day counted on the presence of Tomasz Chruszczow, COP24 Special Envoy for Climate Change, High Level Climate Champion, invited by Climate Chance.

Ronan Dantec, Climate Chance's President participated as well in the Climate Day and spoke during the plenary “African Cities and Territories at the heart of the climate agenda”. It was also an opportunity to announce the upcoming 2019 Climate Chance Summit - Africa to be held in Accra, Ghana.

A long-term work on the African continent from 2017 to 2019...

The Climate Chance team met with Mr. Hafidi, President of the Souss-Massa region council, partner of the Climate Chance World Summit of Agadir in 2017, on the stand of the Souss-Massa region.

“I thank Climate Chance for involving local governments in their work of networking climate actors. For the local governments must more easily obtain climate finance, and unite in inter-municipalities to create shared projects”

MOHAMED BOUDRA, PRESIDENT OF THE MOROCCAN ASSOCIATION OF PRESIDENTS OF COMMUNAL COUNCILS (AMPCC)

“It is essential to create a supportive environment within African local governments, including by building capacity, so that they can access funding, such as from the European Union. This is the work carried out by the CoMSSA (Covenant of Mayors in Sub-Saharan Africa).”

HEAD OF UNIT, SUSTAINABLE ENERGY AND CLIMATE CHANGE, DG DEVCO, EU COMMISSION
Climate Chance participated in events all year round and across the globe. The association participated in the Talanoa process and carried the results of its work during the Intersessional meetings, the COP24 as well as the GCAS.

WHERE? Bonn – Germany
WHEN? 30th April – 10th May during the UNFCCC (United Nations Framework Convention on Climate Change) intersessional meetings.
WHO? Climate Chance in partnership with WECF and ICLEI.

Side-event on access to climate finance of non-state actors. This side-event highlighted the need for climate finance inclusion at local and regional levels.

Important results:
- 13 action priorities were submitted to the Talanoa Dialogue platform
- Ronan Dantec as President of the Association and climate spokesperson of UCLG participated in the Talanoa day
- The Climate Chance Africa Summit was officially announced during a press conference in Bonn.

WHERE? Katowice, Poland.
WHEN? 12th December during COP24
WHO? ENERGIES 2050, UCLG-A (United Cities and Local Governments – Africa), The Council of European Municipalities and Regions (CEMR) and Climate Chance Association.

The side-event “Structuring and strengthen climate action in African towns and communities: Task force UCLG-A” presented the Climate Task Force’s action plan aiming to structure and strengthen climate action in African towns and communities.

Important results:
This was the first opportunity Climate Chance had to work in partnership with UCLG-A in the framework of its Climate Task Force. Climate Chance was able to bring examples of good practices and initiatives from African cities and municipalities identified by the Global Observatory on Non-State Climate Action.

Find out more on the other events organised by Climate Chance focused on the Global Observatory on non-state climate action during COP24 on page 28.
**EVENTS**

1. **WHERE?** San Francisco-United States of America  
   **WHEN ?** 12-14 September 2018  
   **WHO?** Bernard Soulage, the — General Secretary of the association, Leila Yassine, Africa Programme coordinator and Vincent Kouaoh N’Cho the vice-governor off Abidjan were all part of the Climate Chance delegation that attended the event.

The Global Climate Action Summit was an important event on the 2018 International Climate Agenda and Climate Chance organised a Side-event and presented the results of the first Climate Chance Africa Summit.

**Important results:**  
This summit enabled the Climate Chance delegation to add the Mayor of Quelimane-Mozambique, Manuel de Araújo, vice-president of ICLEI-Africa’s signature to the Declaration of local sub-national leaders of Africa carried by Climate Chance since 2017.

2. **WHERE?** Brussels, Belgium.  
   **WHEN ?** 29th October 2018.  
   **WHO?** Romain Crouzet Programme Director at Climate Chance

A public audition was organised by the European Economic and Social Council and Climate Chance shared its 13 Action Priorities for assessing climate finance for non-state actors, which was elaborated by Climate Chance’s Finance Coalition.

**Important results:**  
The European Economic and Social Council resumed the 18 recommendations in its opinion that will guide the initiatives.

3. **13TH MARCH 2018**  
   Conference +1,5°C: Suffer or innovate, co-organised by Meteo France, the think tank I4CE, the association of journalists for the environment (AJE) and the association Climate Chance. Ronan Dantec opened the conference.

4. **7TH – 13TH FEBRUARY 2018**  
   Ronan Dantec was invited by the Network of Urban Planning agencies and spoke at the World Urban Forum in Kuala Lumpur.

5. **30TH JANUARY**
   **1ST FEBRUARY 2018**  
   Bérengère Batiot and the Observatory team participated in the “Assises Européennes de la transition énergétique” in Geneva.

6. **24TH – 30TH SEPTEMBER 2018**  
   Ronan Dantec went to the Climate week and attended the One Planet Summit that was happening at the same time in New York.

7. **13TH NOVEMBER 2018**  

8. **9TH-10TH NOVEMBER 2018**  
   Climate Chance was a partner of the Young Africans for the Climate Summit in Abidjan.

9. **5TH-7TH NOVEMBER 2018**  
   Ronan Dantec did a speech during the plenary session of the General Assembly of the International Association of French-speaking Mayors (“AIMF”) in Lille.

10. **9TH-13TH APRIL 2018**  
    Vanessa Laubin the general director of Climate Chance spoke during the first week of the African Climate Week organised by UNFCCC in Nairobi.
Launch of the Climate Change Summit - Africa in June 2018, several tools structure the Portal of Action: the cartography of action, the climate library, and the climate calendar.
**Cartography**

A CALL FOR PROPOSALS TO INVOLVE ACTORS FROM THE FIELD

The Climate Chance Summit - Africa was an opportunity to call on the many African participants to actively contribute to the first call for proposals for the Cartography of action! The main objective of this cartography is to promote multi-stakeholder exchange and encourage the creation of new initiatives by disseminating these good practices.

**THE CALL FOR PROPOSALS**

Around 150 initiatives were submitted, most of them coming from actors who have already participated in our summits and are part of Climate Chance coalitions. The call for proposals took the form of an online form structured in 3 parts:

- the initiative
- The project entity with contact information
- the partners who made the project possible

**SHOWCASING ACTORS**

The main aim of the cartography for action is to highlight initiatives led by non-state actors at the global level. For this, two elements have been put in place on the association's website:

Bringing light to projects by promoting them on the homepage of the website. 3 projects are visible and change as soon as new projects are uploaded. There is a specific project with the description of the initiative, the project leader, contact data, links to social networks, photos, project videos and any other useful content.
The Climate Library

SHARING OF CLIMATE INFORMATION AND KNOWLEDGE

The climate library now has almost 100 publications, and aims to make knowledge and information accessible, primarily in French, to non-state climate actors. For now, the library mainly contains official texts (Paris Agreement) and sector reports (agriculture, energy, etc.). Gradually, the library will centralize all climate-related information in English and French, this includes databases, videos, decryptions, infographics and any other type of document that may contain relevant information.

Climate Agenda

Climate Chance also has the long-term desire to disseminate the information about climate-related events or forums. The purpose of the Climate Agenda is to bring together several types of events: events related to international negotiations of the United Nations Framework Convention on Climate Change, Climate Chance events and events related to the environment and climate change: sustainable development (World Water Forum, World Urban Forum, Movin’on etc.)

4 MAJOR EMISSIONS SECTORS COVERED
GLOBAL OBSERVATORY ON NON-STATE CLIMATE ACTION

The Observatory aims to publish annually, in the form of an annual report, a global analytical synthesis illustrated by strong examples that aims to facilitate the understanding of the tools available to non-state actors to replicate their actions in a more efficient way.
The first edition the Observatory Report on Global Non-State Climate Action was published on the 20th of November 2018. Divided into three books: sectoral action, local action and financial action, each book analyses one specific dimension of greenhouse gas reduction actions implemented by non-state actors.

**BOOK 1**
Which sectors and which countries were analysed?

**Countries that were analysed**
GERMANY, CANADA, UNITED STATES, CHINA, KENYA, PORTUGAL, SOUTH AFRICA, BRAZIL, SWEDEN, INDIA, IVORY COAST, PERU, FRANCE

**Sectors that were analysed**
ENERGY, TRANSPORT, INDUSTRY, LAND USE, LAND USE CHANGE AND FORESTRY (LULUCF)

**BOOK 1**
**Sectoral action**
Conducted in collaboration with experts from the sectors and countries previously studied, Book 1 is composed of 23 studies each analysing the evolution of greenhouse gas emissions according to a specific sector on a global level (sector profile) or from a specific a geographical zone (country profile). These profiles identify ongoing dynamics and give an analysis of the recent evolutions of the emissions through the initiatives taken by the non-state actors in interaction with the national frameworks of action.

**FOCUS ON A COUNTRY PROFILE:**
The country profile entitled “Stabilization of road transport emissions in the country of ethanol” analyses the challenge in the road transport sector in Brazil in terms of greenhouse gas emissions. Between urban mobility policies and the choice of fuels used, this country profile studies the various factors and measures put in place explaining the evolution in emissions in the Brazilian road transport sector.

**BOOK 2**
**Local action**
Book 2 gives an overview of the climate action implemented by local authorities as well as the international networks to which they belong.

This book is divided into 3 parts: section 1 draws the history of community networks, international conventions and reporting tools used by cities and regions, section 2 presents 23 cases of public policy studies that were implemented on regional and local levels and that demonstrate remarkable results or actions in terms of emissions reduction. Finally, section 3 invites the reader to go "Around the world in 80 best practices", this segment highlights a selection of outstanding local actions by their recent results, their level of ambition or their democratic and inclusive process.
Notebook 2
An analysis of public policies implemented within regions.

Regions
BAD WURTENBERG, CALIFORNIA, HONG KONG, JALISCO, LOMBARDIA, MINAS GERAIS, NEW AQUITAINE, QUEBEC

Towns
ACCRA, CALGARY, THE CAPE, COPENHAGEN, DAKAR, FREIBURG, HELSINKI, IZMIR, MURCIA, NANTES, PARIS, QUITO, RECIFE, SEIXAL, TOKYO

Sectors
WASTE, AWARENESS, DECENTRALIZED COOPERATION, URBAN PLANNING, ENERGY, LULUCF, B TIMENTS, FORESTS, ECONOMIC TRANSITION, TRANSPORT, FOOD, ADAPTATION

FOCUS ON THE WORLD TOUR IN 80 GOOD PRACTICES:
10 sectors of local public policies were analysed. For example, for the waste and circular economy theme, chosen initiatives such as:
- THE DEVELOPMENT OF COMPOST IN CITY IN BESANÇON IN SANTIAGO
- WATER TREATMENT ON A MODEL OF CIRCULAR ECONOMY

BOOK 3
Financial action

Book 3: "Assessment of climate action in the financial sector - The involvement of financial actors"

This book considers the evolution of financial flows mobilised on a global scale for the climate by private and public actors: investors, intermediaries who are asset and bank managers, insurers and finally, financial regulators. Book 3 attempts to estimate the consistency of these different categories of financial actors’ action with regard to climate issues. This is done by crossing three dynamics: actors’ strategies, the market opportunities and the action of the financial regulators. It thus reflects the strategies and policies implemented, the tools put into place and, financing volumes that are conducive to the transition to a low-carbon economy, but also mentions the most damaging ones that slow the transition down.

FOCUS ON INVESTORS:

Book 3 includes an graphic presentation on green finance that summarizes the approach taken.
Since they were published back in November 2018, the 3 Books elaborated by the Observatory of global non-state climate action were disseminated by the association as well as its partners, including Finance for Tomorrow, during dedicated events but also during COP24.

**ONGOING DISSEMINATION OF THE REPORT RESULTS**

**19TH NOVEMBER 2018**

Press conference for presenting the report at the “Caisse des Dépôts et des consignations”

in the presence of Ronan Dantec, President of the association, Amaury Parelle, Coordinator of the Observatory, Pierre Ducret, Climate Advisor, the Caisse des Dépôts group, the President of I4CE, a board member from Finance For Tomorrow and Maria Scolan, Climate Project Director at the Caisse des dépôts group.

**26TH NOVEMBER 2018**

Presentation of the Observatory Report in Paris.

This event was opened by Jean Jouzel the Honorary President of the association as well as Ronan Dantec the President.

3 round-tables and a final debate were organised in order to discuss the different topics highlighted in the report. Therefore, energy, transport and the role local governments play were all analysed by the following participants:

**26TH NOVEMBER 2018**

Presentation of Book 3: the finance actors’ involvement during the Climate Finance Day

by Pierre Ducret, climate advisor, Caisse des dépôts group and I4CE president.
8TH DECEMBER 2018

Press conference during COP24 in Katowice

with Ian Cochran from the Institute for Climate Economics (I4CE) and Andreas Wolter, the Mayor of Cologne and the President of Climate Alliance.

11TH DECEMBER 2018

Bérengère Batiot, Head of Communications and Public Relations presented the report at the Directors Committee of the Council of European Municipalities and Regions that took place in Ludwigburg.

12TH DECEMBER 2018

The Following members of the association were present: Nathalie Le Denmat, director of the monitoring department of the French Agency for Development, Luc Gnacadja ex-minister of Benin, ex-executive-secretary of the United Nations Convention to Combat Desertification; Aurélie Jardin, Partnership and public affairs at Schneider Electric and Eva Banos Guisasola, project manager - Environment, energy and climate at CCRE/CEMR

8TH DECEMBER 2018

Side-event co-organised by Climate Chance, the European Economic and Social Committee and the German Institute for Development (DIE)

on “Building partnerships and following progress – the role of sub-national and non-state actors”. Ronan Dantec, president of Climate Chance and alongside Mame Bousso Faye, ENDA Energie (Senegal), member of Climate Chance association all present the report.

12TH DECEMBER

Presentation of the report to the BINGO group (business and industry NGOs)

during a daily brief at COP24. Romain Crouzet the Programme director was invited by the International Chamber of Commerce to present the results of the report of the Observatory.
Whether it was during the many presentation events or on social networks and the media, the first report of the Global Observatory on Non-State Climate Action made a name for itself.

Congratulations on the report of the Climate Action Observatory, a wealth of information, a very useful reflection tool.

BRIGITTE COLLET, FRENCH AMBASSADOR FOR THE NEGOTIATIONS ON CLIMATE CHANGE

“We can not dissociate the state and the non-state actors, success goes through a synergy of national public policies, local governments, civil society, and this is the message that Climate Chance communicates in this report”

JEAN JOUZEL, CLIMATE CHANGE’S HONORARY PRESIDENT, CLIMATE SCIENTIST, FORMER VICE-PRESIDENT OF THE SCIENTIFIC GROUP OF THE IPCC

Congratulations for this 2018 edition, for its completeness, its clarity, its pedagogy

CATHERINE LEOUL PROUST, HEAD OF STRATEGY OF GRDF

“This report on climate action has the merit of cheering up in a very difficult context, it has the power of demonstrating by example, it strongly advocates for decentralization, and is a tool for mobilizing actors”

CELIA BLAUEL, PARIS DEPUTY MAYOR IN CHARGE OF ENVIRONMENT AND SUSTAINABLE DEVELOPMENT

“Congratulations Climate Chance for this excellent report and it makes me very happy that Finance for Tomorrow is a partner in the Finance book of the report that will fuel the opening session of Climate Finance Day”

ANNE-CLAIRE ROUX, MANAGER DIRECTOR OF FINANCE FOR TOMORROW

We are proud at @ ENGIEgroup to accompany @ ClimateChance in its climate action with non-state actors. Congratulations @ RonanDantec @ VanessaLaubin for the work done and the excellent report you just published # cop24

ANNE CHASSAGNETTE, ENVIRONMENTAL AND SOCIETAL RESPONSIBILITY DIRECTOR FOR ENGIE

“here are more international analyzes on the commitments than on the results, a finer work of analysis of the actions implemented is thus very interesting”

PASCAL CHARRIAU, PRESIDENT OF ENERDATA
Press Review of the Observatory

1 VANESSA LAUBIN, EXECUTIVE DIRECTOR OF CLIMATE CHANCE

participated in the show “CO2 mon amour” on France Inter alongside Valérie Masson-Delmotte climatologist and co-chair of group I of IPCC and Pascal Canfin, General Director of WWF. The show was presented by Denis Cheissoux as part of a special COP24 program.

2 BÉRENGÈRE BATIOT, COMMUNICATION AND PUBLIC RELATIONS MANAGER

was interviewed in the Youtube Channel “Partager c’est sympa” on the subject of the “just transition” and gave the example of Loos-en-Gohelle, a french city engaged in an ecological transition.

COP24 : Five challenges to meet in order to achieve the objectives of the Paris Agreement
The 2018 budget reached € 688,000, a sharp rise compared to 2017 (€ 496,000); 2018 was indeed a year of investments in the activities of the association (Portal, Observatory) whose implementation was ensured in part by service providers and by structuring a full paid staff to carry out all activities.

Despite a very strong positive evolution of revenues, whether it is the private sector or the public partners, an increase of nearly 240,000 € between 2017 and 2018 (excluding the subsidy for the Agadir summit in 2017), the account result is a negative result of € 49,000 mainly due to the underfunding of the Climate Chance Africa Summit in Abidjan. This underfunding was, however, assumed, in order to put Climate Chance on the African landscape, with a successful Summit.

The balance sheet thus shows negative own funds of € 26,000 resulting from the difficulties of the 2018 financial year mentioned above, and a relatively large amount of debt resulting precisely from the cash flow difficulties of the end of 2018 and the beginning of 2019. In addition, the activity of the association remains dependent on the cycle of payment of funds by our donors, which results in certain cash tensions which make it all the more necessary the increase of the working capital and consequently reserves.

However, the Statutory Auditor did not make any particular observations at the General Meeting of April 1, 2019, even though, she considers that strong vigilance is needed to restore the equilibrium in 2019.

In this regard, several measures have already been taken in terms of human resources to balance the 2019 budget and confirms that any new action, including the Climate Chance Africa - Accra Summit, will have to find its own full financing. Commitments already registered or promised give hope that this goal will be achieved. Finally, the 2019 budget, which is in surplus, will seek to create cash reserves, so as to progressively increase working capital to improve the treasury as of 2020.

The past five years have been the hottest on record and according to the Met Office, 2019 shouldn’t be any different.

Despite these observations and the IPCC’s repeated warnings, the Parties of the Paris Agreement do not seem to want to increase ambition, as COP24 has shown. They also seem to not want to rectify their path towards a carbon-free world. At COP24, Antonio Guterres, Secretary General of the UN warned “Missing [the] opportunity [of the COP24] would jeopardize our last chance of stopping climate change, out of control. This would not only be immoral, it would be suicidal”.

This being said, 2019 looks like a turning point. Threats to humanity are generating a growing concern day after day, among the population: climate strikes and marches, collapsology, the judicialization of the fight against climate change, etc. The Climate has therefore become central and is pushing non-state actors to make commitments themselves, to amplify action and to put pressure on states, in the spirit of justice and equity. A few months prior to the effective entry into force of the Paris Agreement, the 1st January 2020, these movements advocate for the agreement to become “dynamic” by reviewing the Nationally Determined Contributions which should theoretically reflect the highest ambition given the circumstances of each country.

2019 OUTLOOK

IN 2019, CLIMATE CHANCE WILL GUARANTEE TO:

Increase and structure the mobilization of non-state actors in their diversity, with several concrete projects that will terminate at the end of the year (African Alliance for Sustainable urban development, mobility & transport roadmap in Ivory Coast, etc.);

Demonstrate the potential of their actions, but also stress the absolute necessity of an enhancement of action via public policies, with the publication of the second edition of the Report of the Global Observatory on Non-State Action on the Climate;

To raise the voice of non-state actors in international bodies by highlighting their primary needs to amplify their actions, particularly on the African continent, through participation in key events on the continent and the organization of the Climate Chance Summit in Accra (16th-18th October 2019).
Together, with our partner networks, we will devote all our energy to humanity in order to change our direction.
