Compte-rendu de la session

“Structurer et progresser dans sa stratégie d’adaptation au changement climatique : le cas de la méthode ACT Adaptation / *Structuring and advancing your climate change adaptation strategy: the case of the ACT Adaptation method*”

du SCCE 2024 WA, 8 février 2024, 16:00 - 17:30

Description / *Description* :

Depuis 2015, l'initiative ACT - Assessing low-Carbon Transition® a accompagné et évalué plus de 350 organisations avec des méthodologies prospectives et sectorielles pour délivrer des plans de transition climatique et juste crédibles. Cet atelier est une introduction à la méthodologie ACT-Adaptation, récemment publiée et développée par l'Ademe. La session vise à fournir aux participants des outils pratiques pour évaluer la stratégie d'adaptation de leur entreprise, afin de repérer les points forts et les opportunités d'amélioration. Elle s'appuiera également sur le retour d'expérience d'entreprises pilotes ayant expérimenté la méthodologie, et dressera des perspectives.

Since 2015, ACT – Assessing low-Carbon Transition® initiative has supported and assessed more than 350 organizations with future-oriented, sector specific methodologies to deliver credible climate and just transition plans. This workshop is an introduction to the newly released ACT-Adaptation methodology, developed by the Ademe. The session aims at providing attendees with practical tools to evaluate their companies’ adaptation strategy, in order to spot strengths and opportunities for improvement. It will also draw on feedback from pilot companies having experienced the methodology, and set perspectives.

Organisé par / *Organised by* :

- Ademe
- World Benchmarking Alliance
- Climate Chance

Recommandations opérationnelles politiques publiques UE / Operational EU public policy recommendations :

| Intervenant.e / Speaker | Recommandations opérationnelles politiques publiques européennes (l'adaptation, la résilience et les solutions basées sur la nature) / Operational EU public policy recommendations |
|-------------------------|--|
| Stephia Latino | - Public/government sector could apply the ACT methodology |
| Rémi Bussac | - Take into account the evolution of climate in all major investment decisions |
| Chen Chung (Jason) Tan | - From a practical standpoint, the climate scenario analysis shouldn't hinder any organization from making projections. Currently, it demands extensive knowledge and techniques, but exploring ways to make it easily accessible for all is a worthwhile consideration. |

Bonnes pratiques remarquables et répliquables à l'échelle de l'UE :

| Intervenant.e / Speaker | Bonnes pratiques remarquables et répliquables à l'échelle de l'UE / Good practices replicable at the EU level |
|-------------------------|--|
| Stephia Latino | - ACT Adaptation methodology |
| Chen Chung (Jason) Tan | - Embrace a human-centric, community-based adaptation strategy and seamlessly integrate it into the core of your business operations for a truly impactful transformation. |

Une phrase clé / verbatim par intervenant :

| Intervenant.e / Speaker | Verbatim, phrase clé / Verbatim, key sentence |
|-------------------------|--|
| Stephia Latino | "Adapting to climate change throughout the whole value chain, without damaging mitigation efforts" |
| Rémi Bussac | "With installations having a technical lifetime well over 40 years and delivering a critical service to businesses and communities, the electricity sector has no choice but to work on its adaptation to climate change, considering a large range a climate scenarii." |
| Romain Poivet | "Companies MUST think about climate change adaptation" |
| Chen Chung (Jason) Tan | "Let's craft an adaptation strategy that not only prioritizes the human touch and community focus but also seamlessly integrates into the natural ecosystem, becoming an integral part of it." |
